Omran Khaled

Front-End Developer | React & Next.js Specialist

Damascus, Syria | Email | Phone: 0943926870 | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Front-End Developer specializing in modern, responsive, and user-centered web applications built with React, Next.js, TypeScript, and JavaScript. Skilled in designing reusable component systems, implementing maintainable front-end architectures, and delivering scalable interfaces with strong attention to usability, accessibility, and performance.

SELECTED ENGINEERING PROJECTS

Khuta — Smart Tourism Platform for Syria

- Developed a modern, multilingual tourism platform enabling travelers to discover destinations, explore attractions, plan personalized trips, and access location-based information.
- Designed reusable React components following component-driven architecture.
- Built complete Arabic and English localization with automatic RTL/LTR switching.
- Developed an interactive trip planner based on user preferences and integrated interactive maps using Leaflet.
- Implemented fully responsive layouts optimized for all screen sizes.
- Structured the application for future backend integration using Mock APIs and TanStack Query.

Tech Stack: *React, TypeScript, Tailwind CSS, React Context, TanStack Query, Leaflet*

Wnadr — Global Tourism Discovery Platform

- Designed and developed a premium tourism platform for discovering attractions, organizing trips, and exploring destinations through a polished, responsive user experience.
- Built a reusable design system with modular UI components using CVA (Class Variance Authority).
- Implemented adaptive Light/Dark themes with system preference detection and a Glassmorphism-based UI.
- Developed responsive layouts for desktop, tablet, and mobile, and created an AI-inspired conversational interface.
- Structured reusable layouts and UI modules for long-term scalability.

Tech Stack: *Next.js, TypeScript, Tailwind CSS, Framer Motion, CVA*

Library & Inventory Management System

- Developed a full-stack library management system supporting inventory management, borrowing operations, sales tracking, and administrative dashboards.
- Built RESTful backend services and a responsive administrative dashboard.
- Implemented borrowing/return workflows with automated overdue-fee calculations.
- Applied layered architecture using service and repository patterns, connected to MongoDB via Mongoose.

Tech Stack: *Node.js, Express.js, MongoDB, Mongoose, TypeScript, JavaScript, HTML, CSS*

EDUCATION

Diploma in Computer Technologies — Applied College, Damascus University

2022 – Expected Graduation: 2028

PROFESSIONAL TRAINING

Front-End Development Trainee — Byte4Future (B4F), Aga Khan Foundation (AKF)

- Completed a five-month intensive, project-based training program covering modern software development, JavaScript technologies, Git workflows, problem solving, and collaborative engineering practices.
- Built practical projects using React, React Native, Next.js, Node.js, Express.js, NestJS, MongoDB, Git, and TypeScript.

PROFESSIONAL CERTIFICATIONS

AI Fluency: Framework & Foundations — *Anthropic*

- Professional certification covering AI literacy, responsible AI usage, prompt engineering fundamentals, effective collaboration with Large Language Models, and AI-assisted software development workflows.

TECHNICAL EXPERTISE

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, Python (Fundamentals)

Front-End: React, Next.js, React Native

UI & Styling: Tailwind CSS, Responsive Design, CSS Grid, Flexbox, Dark Mode, Design Systems

State & Data: React Context API, TanStack Query, Local Component State, REST API Integration

Backend Knowledge: Node.js, Express.js, NestJS, MongoDB, Mongoose

Tools: Git, GitHub, VS Code, Vite, npm, pnpm, Figma

LANGUAGES

Arabic — Native | English — Professional Working Proficiency (B1–B2)
